

WE SPEAK GARBAGE

PTTG
PODDAR MERCANTILE GROUP

A hand wearing a bright yellow nitrile glove is shown holding a roll of black plastic bags. The roll is partially unrolled, with one bag hanging down. The background is a solid, vibrant blue. The text "Since 1999" is overlaid in a white, serif font, centered on the black bag.

Since
1999

Established in 1999, PMG is recognized as a leading manufacturer and exporter of plastic bags.

PMG commenced their operations in 2004 in Kolkata, West Bengal which is the only metropolitan city in East India.

With a career graph spanning over 18 years, PMG has positioned itself as the regional leader in terms of plastic production. PMG is owned by Ashok Kumar Poddar who has led the company with his impeccable vision and experience to dominate the market and offer an extensive product range at an affordable price.

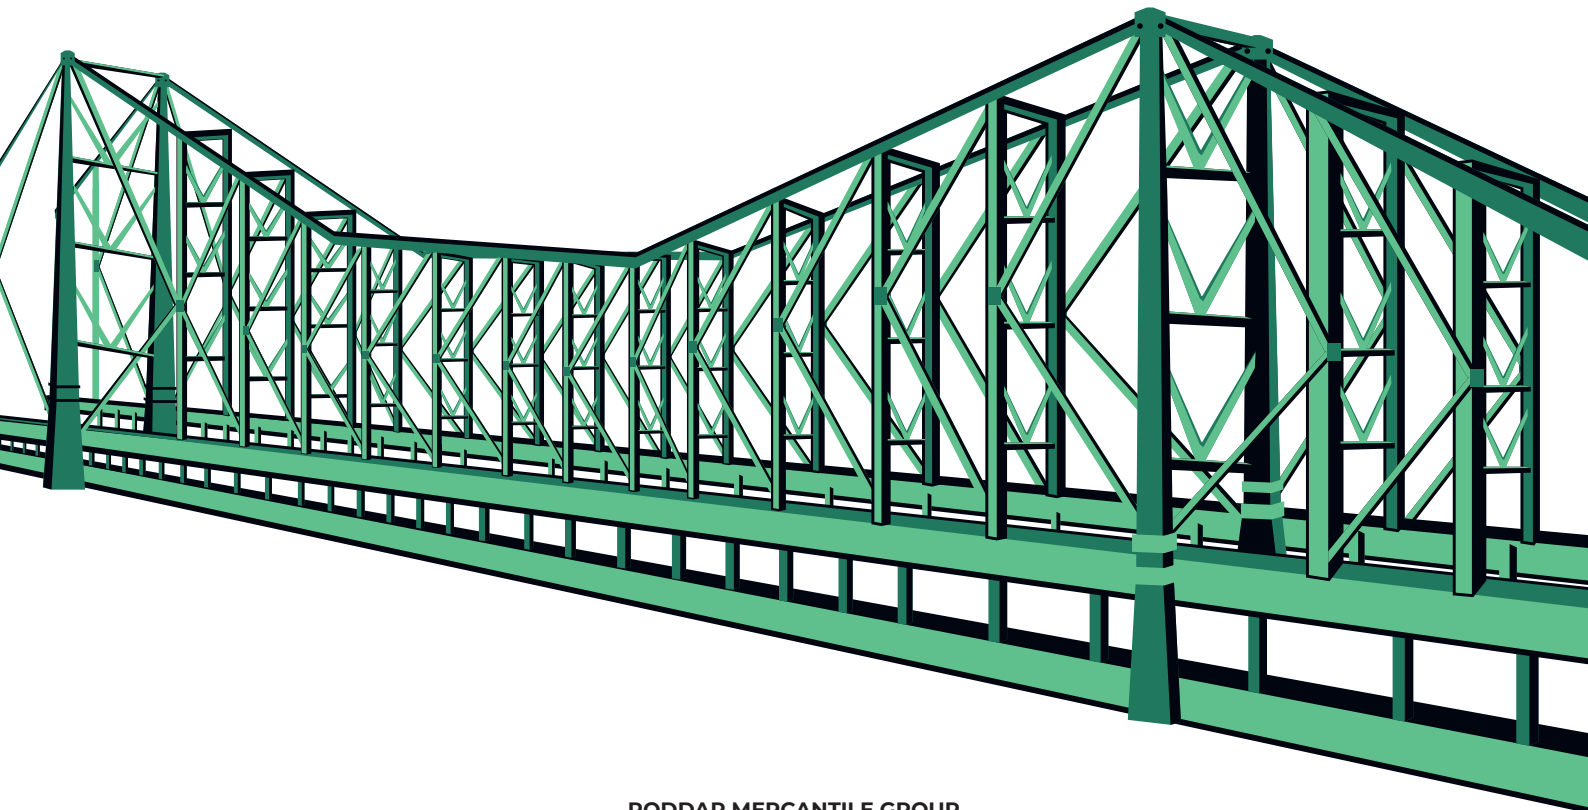

A commitment to quality, innovation and speed is why market leaders across the United States and Europe trust PMG to deliver high quality products.

Strategically located in Howrah, between Kolkata and Haldia ports.

Strategically located in Howrah,
between Kolkata and Haldia ports,
famously known as river ports,
PMG factory is based in the
Sankrail industrial area which is
known as, one of the best
developed industrial areas in the
region.

At the 50,000 sq facility, PMG
houses some of the best inventory
and workforce in the region, giving
them a competitive edge over
other manufacturers in the market.

Research & Development

PMG in collaboration with RCC World Class Facility, has an ambitious project to build a comprehensive infrastructure on a 100,000 sq V land, and provide world class amenities and services like top notch machinery, air conditioning by harvesting in-house solar power with a team of highly qualified workforce catering to food packaging industries.

“The Earth is what we all have in common”

- Wendell Berry

At PMG, environmental conservation is a key factor and the company has made substantial investments in a Spanish R&D firm, to develop specialized enzymes for manufacturing plastic, which can be easily sustained in the environment.

World class facilities

Production facilities

At PMG, the driving force behind continuous improvement is to meet the needs of its consumers and keep up with the latest trends. PMG has been investing in top class inventory such as robotic palletizing systems, auto loaders and batch mixers. For maximizing the output PMG uses four loading and unloading bays to ease the work done by it's employees.

PMG's main production area is also equipped with 6 monolayer plants for production of polymer films. With 13 multilayer plants and a three layer automatic plant, their output generation has significantly increased over the years, with PMG now producing 750 metric tons a month compared to 15 metric tons

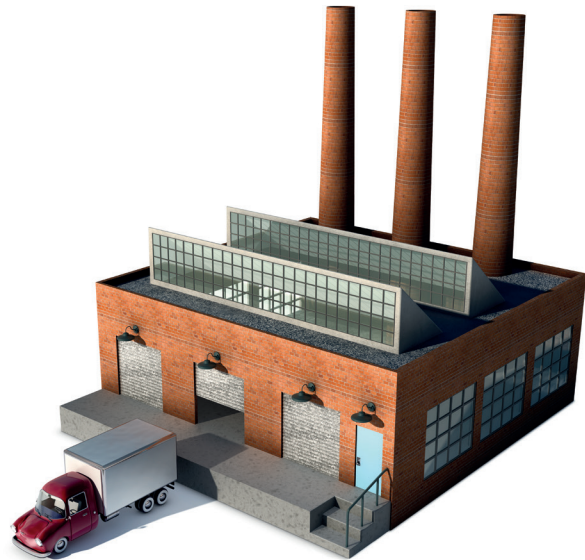

a month. PMG has set alliances with leading Taiwanese and European manufacturers for bringing in bag making machines to facilitate premium production of drawstring bags.

The vicinity also includes an in house pollution free plant along with a recycling station, to keep production wastage at minimum. In regards to quality, they have a testing lab set up to ensure all their products are manufactured using the parameters set in place. PMG is the first manufacturer in India to roll out water based ink for plastic production.

Workforce

PMG is managed by a dynamic team of 250 individuals who are trained, highly qualified and knowledgeable to assist in material selection, product design as well as development of product. They work around the clock to ensure smooth operations.

Product Listings

As a leading plastic manufacturer, PMG has developed a diversified range of products for its consumers. The list is certainly endless but some of the most popular products include:

Garbage Bags

Plain or printed drawstring garbage bags

Vest type carry bags

Grocery bags

Plastic sheets

Shrink film

Co-extruded tamper proof mailers

Doggy bags

Value Proposition

PMG's bags are known for their credibility around the world. They are durable, easy to travel with and leakproof. They are recyclable and serve as multipurpose bags.

PMG has a great eye for market trends, which helped them gain the upper hand by recognizing the potential of drawstrings bags way back in 2010. Today, they produce one of the best quality drawstring garbage bags in the market at a very affordable price point.

With the current situation in mind, PMG provides customization on its bags which makes the segregation process easier. PMG's finished products are delivered on time to one or more nominated locations. The vast majority of companies deliveries are sent in a single shipment, which ensures consumers receive their shipment on time and without any damage.

Aliances

In light of the growing client base of PMG, the management has decided to expand further and collaborate with various leading manufacturers across the board. PMG's customer base includes manufacturers from all over the world like WBV Worldwide Germany, Prodinge Germany, among many others. PMG also offers production and export services for private labelling globally.

Achievements

In a short span of 2-3 financial years, PMG has positioned itself as a member of Star Export House, for achieving excellence in quality exports. With a highly trained and knowledgeable workforce and state of the art technology, PMG has been a market leader when it comes to innovation and producing qualitative products.

PMG has been honored with an ISO 9001 and 14001 certification, for showcasing a positive attitude towards controlling environmental damage without compromising on quality production. We are the only company in the Eastern region of India, approved to use the ISI hallmark and are a Star Export House recognized by the Govt. of India.
